Aiming for Data Engineering roles, with 7+ years of experience in ETL, SQL, Data Warehousing, Data Quality and Data Modelling

EXPERIENCE

Perficient Inc. (Lead Technical Consultant)

Senior IDQ Developer for BNY Mellon

Remote, India

Feb 2023 - April 2025

- Worked for the finance stream and dealt with critical data on a daily basis
- Created rule based profiling for loans, treasury and finance data domains
- Created scorecards in both live and staged mode
- Handled invalid data mappings and bad record exception reports

Incept Data Solutions (Consultant)

IDQ Developer for PepsiCo

Remote, India

Nov 2022 - Feb 2023

- Worked on improving PepsiCo product database data quality
- Led an offshore team of 5 members, tracked team task progress, and created weekly reports for the onsite manager
- Critically analyzed data quality, proposed and implemented required DQ rules
- Performed POC on API calling and shell script execution through IDQ mappings and workflows

Capgemini (Consultant)

IDQ Developer for Mubadala Investment Company

Mumbai, India

May 2021 - Nov 2022

- Worked on data quality improvement of deals data and studied basic data governance
- Created scorecards, performed rule-based profiling and designed periodic summary reports
- Performed POC for email notifications in order to alert the data steward about data quality changes. Code was deployed to production in the next cycle
- Designed rules for duplicate deals records and managed duplicate record exception reports

IDQ Developer for Renault DLP

- Performed data validations on inventory data for Renault
- Developed mappings and LDOs to perform reconciliation of data from different source systems like MPR88 and MLA
- Designed mappings for delta feeding to facilitate easy comparison between old data and new files of the same source system
- Created profiles and scorecards on different source and target files to check for all data quality dimensions and for rule creation

Tata Consultancy Services (Systems Engineer)

ETL Developer for NSDL

Mumbai, India

Dec 2017 - May 2021

- Worked on data warehousing, data cleaning and processing for the Central Recordkeeping Agency (CRA) platform using Pentaho Data Integration
- Developed multiple features/frameworks as per client requirement:
 - * SMS & email functionality for withdrawal, ERM, and subscriber rectification module
 - * Cancellation framework for marking the entities or subscribers as inactive based on CRA regulations
 - * Folder management framework for the CRA platform to provide optimum performance compared to an existing Java job
 - * APY report generation framework in ETL to for efficient reporting
 - * ETL job as a web service - POC

- Supervised production support for resolving escalations raised by subscriber/entity
- Performed profiling and created scorecards for the pension data of subscribers using advanced IDQ transformations such as Parser, Standardizer, Lookup, and Aggregator

SKILLS
