ACADEMIC & PROFESSIONAL INTERESTS

My academic and professional interests lie in the intersection of Databases, Data Visualization and Human Computer Interaction. I build interactive data visualization and analysis systems to cater to the growing need of big data analytics. Specifically, my focus is on **network data** visualization and analysis. I am also interested in visualization perception research with regard to uncertainty visualization, and my passion and awareness about environmental issues drive me towards applications of my research interests in spreading literacy through data visualizations, especially in the space of **socio-environmental** data science contexts.
